

Microsoft Silverlight Fix for Google Chrome Version 42.0.2311.90 Only

If you are using an earlier version of Google Chrome you should not experience issue with Microsoft Silver light.

1. Open Google Chrome and type the following in the address bar:

chrome://flags/#enable-npapi

2. The 10th option down will say “**Enable NPAPI Mac, Windows.**” Below that is blue text that says “**Enable.**” Click the blue text that says “**Enable**”

3. Once clicked, the word “**Enable**” will change to “**Disable**” and the background for that item will turn white.

4. **Close** Google Chrome and **reopen** it.
5. Now type the following into the address bar:

Recorderweb.co.franklin.oh.us/pax

6. The website should load like normal.
